WORK EXPERIENCE

Product Designer • Ikon Technologies

Arlington, TX • Jun 2023 - Present • Full-time

Ikon Technologies is a leading vehicle-telematics company specialising in streamlining automotive lot management and customer retention, serving 450+ car dealerships across the United States.

- **Led the 0→1 redesign of Ikon's dealer platform**, transforming it from a vehicle tracking tool into a unified operating layer for inventory, analytics, sales, and service workflows. **Drove adoption across 139+ dealerships (~33% of the business and ~\$20M+ ARR)** and helped unlock the company's largest enterprise deal.
- Designed and shipped an **agentic marketing platform**, translating first-party vehicle signals into targeted outreach and service retention for dealerships and internal operators. Secured executive investment and **strong pipeline interest at NADA 2026**.
- **Established and evolved Ikon's cross-platform design system**, exposing tokens and components as code-ready primitives for engineers and agentic workflows. Defined governance and guardrails to **standardize probabilistic UI generation** and minimize drift between design and production code.

Product Designer • PathAI

Boston, MA • Jun 2022 - Aug 2022 • Internship

- Designed and shipped a collaboration tool on AISight Dx, **enabling 1.2K+ pathologists to achieve faster turnaround times**, increasing daily case sign-outs and improving patient outcomes.
- Partnered with a design researcher to **conduct 5 semi-structured interviews** with pathologists, SMEs, and internal stakeholders to gather key user insights, and ensure alignment on the design direction across multiple cross-functional teams.
- Collaborated with the scientific writing team to standardise the naming terminology for Slide Viewer components, improving product clarity, cross-team communication, and regulatory compliance for PathAI's clinical IFUs.

Product Designer • BigBasket

Bangalore (Remote), India • Feb 2021 - Jul 2021 • Internship

- Built the first Design System for **India's largest grocery delivery app** from scratch, adopted by **200+ engineering and product team members**, with foundational tokens, reusable components, and patterns that improved efficiency, streamlined development efforts, and accelerated product delivery.
- Led UX research and analysed data metrics to uncover key issues and opportunity areas for the Rate & Reviews feature redesign, impacting over **10 million customers**.

Founding Product Designer • SureLocal

Chennai India • Apr 2019 - Nov 2019 • Part-time

- Collaborated with the founder and engineers to design a mobile app for inventory and POS processes. Helped reach product-market fit through key feature development, prototypes, and investor pitch decks, directly contributing to **raising \$1 million** in seed funding.

EDUCATION

University of Michigan, Ann Arbor

MS. in Human Computer Interaction

Ann Arbor, MI • 2021 - 2023

SRM University, India

B.Tech in Computer Science Engineering

Chennai, India • 2017 - 2021

CERTIFICATIONS

Craft at Speed

Instructor: Andy Madrick (Product Designer, Notion)

AI Prototyping for Product Managers

Instructor: Colin Matthews (Fractional PM Leader)

PM Masterclass for Designers

Instructor: Ryan Scott (Ex-Airbnb & DoorDash)

UI Engineering 101 for Designers

Instructor: Mariana Castilho & Derek Briggs

Become an AI Product Designer

Instructor: Maheen Sohail (Design Lead, Meta AI)

SKILLS

Design, Motion, & AI Workflows

Figma · Cursor · Claude Code · Paper · Design Systems (Tokens, Variables, Modes) · Storybook · Flora · MagicPath · Weave · Higgsfield · Responsive Design · Interaction Design · Information Architecture · Motion Design · After Effects · Jitter · Rive

Product Strategy & Ownership

Roadmap Planning · Product Intake & Prioritization (RICE, MoSCoW) · JTBD · Stakeholder Management · DesignOps · PRDs & Specs · Strategic Alignment · Vendor Evaluation · Third-Party Integrations

User Research & Data Fluency

Contextual Inquiry · Insight Synthesis · Usability Testing · Customer Journey Mapping · Heuristic Evaluation · Experimentation & A/B Testing · HEART Framework · Airtable · Perplexity · Mixpanel · Hotjar

Frontend & Design Engineering

HTML/CSS · JavaScript/Typescript · React · Next.js · Vue · Tailwind · Git/GitHub · Animation (GSAP, Framer Motion) · 3D/WebGL (Three.js, React Three Fiber) · Playwright (E2E Testing) · Vercel/Netlify Deployment
